## Big lighting for small venues

No venue is too small for good lighting. Let ETC's ColorSource family redefine what you can do with your budget.

With ColorSource, you can take advantage of additive LED color-mixing without breaking the bank. Render your stage in rich colors and brilliant, flattering whites from the ColorSource PAR, Spot, Spot jr, CYC, and Linear luminaires.

ColorSource fixtures go through rigorous testing with a third-party laboratory so you know what you're getting from day one. With an expected lifetime of more than 50,000 hours, your grandchildren could be using the exact same fixtures you're using today.

ColorSource fixtures hold a five year warranty on the fixture and a ten year warranty on the array. Like all ETC products, ColorSource is backed by our 24/7/365 guarantee.

ColorSource fixtures are great for schools, churches, nightclubs, atriums, lobbies, restaurants, and performance spaces of every size.

# BIG PERFORMANCE. SMALL PRICE TAG.

## SPOT

The ColorSource Spot provides bright, focusable, flattering light that can be easily adjusted without the need for color filters. Because the fixture accepts all Source Four LED accessories, including zoom and fixed-focus lens tubes, CYC and Fresnel adapters, a single Spot fixture can play multiple roles from show to show.

## SPOT jr

Don't let the small size and low cost fool you. Spot jr packs a punch at only half the weight of the full-sized Spot. Add in the 5,000-lumen output, the built-in zoom capability, and the impressive color mixing, and you'll see this fixture has a lot to offer.

## PAR

The ColorSource PAR produces a soft wash light, allowing you to easily alter the mood onstage with bold or subtle color. Like all ColorSource fixtures, these luminaires can be controlled with or without a console, making them perfect tools when you need to add a simple color accent to a one-off event.

## LINEAR

Whether hung from a rig or used as side or footlights, ColorSource Linear luminaires provide a seamless line of light across the stage. Available in half meter, one meter and two meter lengths, these strip lights are designed to be mounted end-to-end, with no visible break in the light array.

## CYC

The ColorSource CYC is a dedicated cyclorama fixture designed by ETC color specialists to create a smooth, beautiful wash of light. The five color mix of this fanless fixture is a unique blend of red, green, blue, indigo, and lime which gives an incredible range of colors at an affordable price. Your cyclorama will finally get the attention it deserves.

# Color Integrity

ColorSource luminaires are factory-calibrated to ensure consistency. They feature color mixing systems that offer bright, vibrant colors and perfectly-mixed pastels.

The thermal management algorithms built into every ColorSource fixture ensure that the colors you choose in rehearsal are the colors you get during the show.
